

About Kurv

Full Bio

Kurv is a trusted payment processor headquartered in Cleveland, Ohio, with locations across the country. As a leading provider, Kurv offers merchant services, credit card processing, mobile and contactless payment solutions (including Tap-to-Pay and QR payments), and eCommerce payment gateways for SMBs, delivering robust solutions that simplify and expedite how businesses accept payments.

Kurv lets merchants accept payments in person, online, and on the go from a single connected merchant account. That includes PCI-compliant payment gateways and virtual terminals, native Tap-to-Pay on iPhone and Android, hosted checkout pages, digital invoicing, QR code payment requests, recurring billing, and eCheck and ACH payments. Kurv's modern POS systems are built for a variety of industries, including retail, petroleum, automotive, field services, and B2B. Kurv manages it all through the proprietary Kurv merchant dashboard and mPOS app, backed by dedicated customer support and underwriting that can approve accounts in as little as one business day.

Kurv also offers competitive ISO/Agent reseller programs with state-of-the-art onboarding technology, ISV partnerships, and embedded payment solutions for software platforms looking to monetize payments — all built to keep modern payments simple.

Kurv further leverages the robust services of its subsidiaries, Peel Payments, MaxxPay, and PaymentCloud, to drive client success. Discover more at kurvpay.com.
